

Know that your data is safe and secure with DataTrust Secure Online Backup

DataTrust – the Secure Online Backup Solution.

Forget about tapes, disks, zip-disks, memory sticks or any other form of backup media. DataTrust's Secure Online Backup Solution gives you peace of mind. Relax, secure in the knowledge that your files are automatically backed up over broadband to secure servers in three different locations in Ireland and the UK.

The Setup process

DataTrust review, discuss and advise on the data to be backed up via the DataTrust Information Audit or indeed this process can be carried out by your own IT Services Provider. The Client Software is installed and configured on your equipment. Daily emails confirm the successful backup and an ongoing customer-performed test restores will provide further confirmation, eliminating any doubts or concerns you might have. **Simple, efficient, effective.**

Security of backup data

Backup data is **encrypted to military levels**. The encrypted data is transferred over secure lines (like those used by the major banks for online financial transactions). The backed-up (encrypted) data is stored on secure servers in three different locations (in Ireland and the UK). Nobody can read your data - even we can't because you are the only one with the key to decrypt it.

How can I restore my data?

A simple restore screen allows you to retrieve individual files, groups of files or entire backups.

DataTrust can eliminate all of the following concerns:

- ✓ Forget to take the backup tape or disks home?
- ✓ Members of staff with tapes or disks at home? What if they decide to leave the company – they have a copy of all of your data?
- ✓ Are you sure the backup tapes or disks can actually be restored? Are they damaged in any way? Are you sure you can read them?
- ✓ What if someone breaks into your offices and trashes your equipment?
- ✓ What if your server or PC's crash and the hard disks fail to work?
- ✓ What if a disgruntled staff member sabotages your data?
- ✓ "Oh no!, come back, I didn't mean to delete you." Does that sound familiar?
- ✓ A fire in the office – "I dread to even think about the consequences"
- ✓ Am I complying with Data Protection legislation?

What price will you pay for peace of mind?

The pricing is based on the amount of space your data takes up on our servers. Full pricing details available on our website.
